EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, line 15 on page 3, insert

--Brief Description of the Drawings

Figure 1. Illustration of zenithal bistability using grating alignment (with the lines indicating the local director) showing a) the high tilt (continuous) and b) the low tilt (defect) states.

Figure 2. The a) VAN and b) TN geometries for ZBD showing the director distribution of the high and low tilt states.

Figure 3. The τ -V curve for MLC-6204-000 at 25°C (pulse duration or time slot vs. voltage). The switching voltage ($V_{100\mu s}$) and operating window ($\Delta V_{400\mu s}$) used for comparisons are indicated. --.

In Claims 5 and 23, line 2, insert -- further -- after "component (α)" to clarify the claim language.

In Claim 7, line 1, delete "Use of a liquid crystal composition" to correct typographical errors.

2. The following is an examiner's statement of reasons for allowance:

The present claims differ from the prior art in that the prior art fails to disclose a bistable liquid crystal device and a method of generating an electrooptical effect thereof comprising a liquid crystal composition of the present claims 1 and 19.

The present liquid crystal medium (claims 15-16, 18 and 32) differs from the references newly cited in pto-892 in that the references fail to disclose the percentages of components in the present claim 15, which comprises at least one compound of formula I and at least one formula III with an alkenyl group at left-wing. The present medium has better liquid crystal properties than the references (see examples 9 and 10 of US 6,902,777 and examples 2-4 of US 6,902,776, examples 3 and 6 of US 6,808,763). Therefore, there is no obviousness-type double patenting issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
